Ingredients

Many of our dishes use ingredients sourced locally but beef comes from all over the UK, we use many suppliers to try and get the best quality all of the time.

Steak

Good beef cattle have three main requirements. Firstly, the cow should be grass fed which allows it to grow at normal rate. Secondly, it must be under 30 months old, anything older is past its best. Last and most importantly, it needs to have fat, if it doesn't have fat it won't eat well.

Once we have the right meat we mature it the traditional way by hanging. This is the same method that good butchers use although we leave it a bit longer. Times vary from two to five weeks depending upon the cut. Once we think it's ready we butcher it ourselves on the premises. This means we can cut any size steak you want!

So, what do you want? If it's flavour and tenderness then the fattier cuts, ribeye and sirloin are the best. The ribeye has fat through the middle so if you don't like a bit of fat, it's not for you (should be cooked medium rare minimum to render the fat down). Rump is much leaner but still has bags of flavour with a firmer texture, great cooked up to medium but if you like your meat more well done you would be better with the ribeye or the sirloin. Fillet is the tenderest of them all. Beef cattle weighing around 1250lb only produce about 12lb of this luxurious cut. It may not have the flavour of the other steaks but it melts in your mouth and is the leanest of all. The Famous Rythre T Bones with sirloin on one side and a small fillet on the other is the perfect choice for steak lovers. The meat is sweetest near the bone and a bone-in steak is aged longer than all the others.
